Media release:

Valory Resources appoints Angela Beattie as VP, Regulatory and Technical Affairs

Valory Resources has announced the appointment of Angela Beattie as Vice President, Regulatory and Technical Affairs.

In this senior executive role, Ms. Beattie will be responsible for securing regulatory approvals for the company's projects, overseeing environmental monitoring, and leading technical design and mine planning.

She will play a key role in Valory's leadership team as the company advances its steel-making coal projects in Western Canada.

Ms Beattie brings more than 20 years of experience in regulatory and technical roles across Canada and the United States and is both a Professional Engineer and Professional Geologist in the Province of Alberta.

In 2024, Ms Beattie was honoured with the prestigious Coal Association of Canada's Award of Distinction. The award recognised her exceptional leadership, contributions to the coal industry and unwavering dedication to responsible resource development.

She has extensive expertise in obtaining approvals and ensuring compliance throughout the life cycle of mining projects. Most recently, she served as Vice President, Resource Development & Regulatory Approvals at Northback Holdings Corporation, where she led teams in mine planning, regulatory affairs, and environmental oversight for a proposed metallurgical coal project in Alberta.

Her previous roles include Director of Regulatory Affairs at CST Canada Coal Limited, where she was responsible for licensing and compliance at an operating open pit and underground metallurgical coal mine, and Manager of Regulatory Affairs at Grande Cache Coal Corporation, where she secured approvals for both surface and underground mining operations. She has also held senior technical roles at Deloitte Restructuring Inc. and Golder Associates Ltd.

Valory Resources President Brian MacDonald said Ms Beattie's appointment strengthened the company's leadership team as it progresses its development plans.

"Angela's depth of experience in regulatory approvals, environmental management, and technical mine planning will be invaluable as we advance our projects in Western Canada. Her proven ability to navigate complex regulatory frameworks and engage with stakeholders makes her a great addition to our leadership team."

Valory Resources is a Canadian resources company focused on the development of underground steel-making coal projects. The company is committed to safety, environmental stewardship, and delivering high-quality products for the global steel industry.
